AMARI

Aluminium Innovation

We at AMARI are driven by a passion for innovation, and for the development and implementation of innovative solutions. Our goal is to shape the future actively, and create sustainable added value.

01

The human mind is a marvel. At AMARI, we turn imagination into reality. By thinking in new dimensions, we open up paths to sustainable success.

Our determination to go our own way has made us the leading supplier in the aluminum industry. We have evolved from a semi-finished product wholesaler to a pioneer of innovative solutions. At our company, long-term partnerships with industry leaders continue to inspire new ideas, at all levels, from the CEO to the employees in the workshop. This has only been possible because we made a vision a reality. Our successes are the result of creative thinking. Nothing is as powerful as the imagination.

Founded (1969)

When AMARI Austria was founded in 1969 by then-CEO Günther Nagel, the company specialized exclusively in trading aluminum sheets and profiles.

Today

AMARI has developed into one of the most innovative industrial businesses in Pongau. Under CEO Josef Reiter, and with around 450 employees, the company supplies and serves customers in Austria and neighboring countries.

8 locations

AMARI has a total of eight subsidiaries located in Austria, Slovenia, Hungary, and Romania.

7 segments

AMARI is active in seven segments: semi-finished products, mechanical engineering, road transport, rail transport, Amadeus sliding elements, rear-ventilated facades, and flood protection.

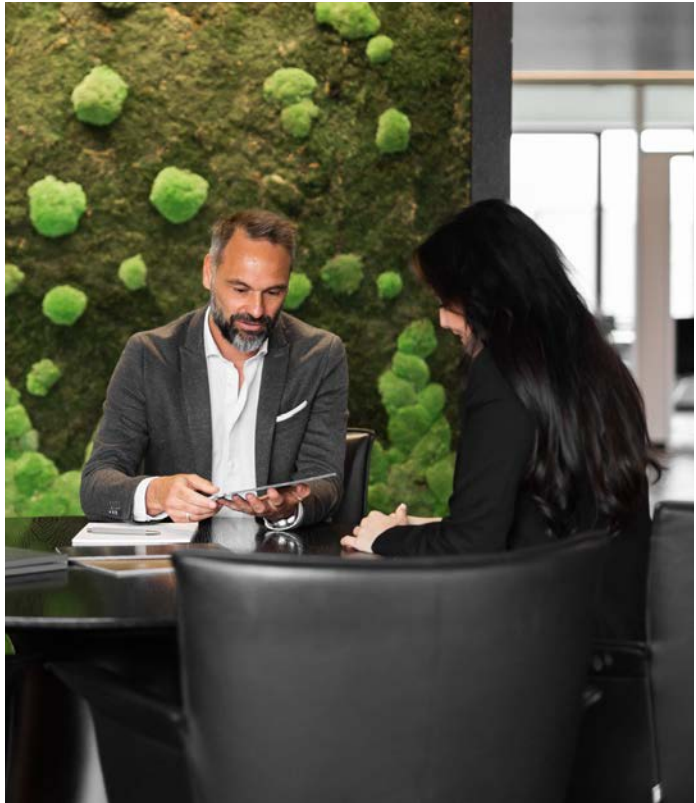

450 employees

We are delighted to already have a team of 450 people, and could never have got this far without a great team.

People create the difference.

At AMARI, we offer employees outstanding opportunities to succeed and build a career. We place great value on employee development and promote individual strengths. Our many years of experience and expertise in the aluminum industry have created an ideal environment for professional growth.

Innovation Center

Long-term partnerships with global market leaders in their industries are constantly giving rise to new ideas, originating at all levels of the company – from the managing director to the shop floor staff. AMARI is strongly committed to innovation and technology.

Every day, our employees develop solutions in the Innovation Center and drive progress throughout the industry. The pace of innovation here is rapid to ensure the possibilities of aluminum processing are fully exploited.

Industry, Architecture, Transport

Aluminum is highly malleable, so we take advantage of each and every possibility. We develop solutions that set new standards in seven business units.

Semi-finished products

AMARI stocks a wide range of commonly-ordered rolled, pressed, and cast products, made available to our customers from stock with a delivery time of 12-48 hours.

Mechanical engineering

Decades of experience in the manufacturing of milled parts and technical components have ensured AMARI is a reliable partner for commonly-ordered mechanical engineering companies.

Transport Road

Supreme quality is a given with 45 years of expertise in the design and manufacture of components for vehicle construction.

Transport Rail

AMARI is one of the leading suppliers of rail vehicle components, including structural parts, pantographs, substructures, and interior paneling.

amadeus sliding doors

AMARI sets new standards in the field of frameless sliding elements. Customizable design allows architects and investors to implement design ideas to perfection.

Ventilated facades

AMARI is a leading full-service provider, offering optimally designed solutions in the form of aluminum composite panels and substructures.

Flood protection

AMARI's versatile flood protection systems impress with manual and automatic solutions, and are used successfully in building and landscape protection.

04

Rolled and cast products

Versatile, reliable, immediately available
AMARI is an experienced full-range aluminum supplier, and stocks an extensive range of rolled and cast products in various alloys, special formats, or cut-to-size dimensions – all available immediately from stock.

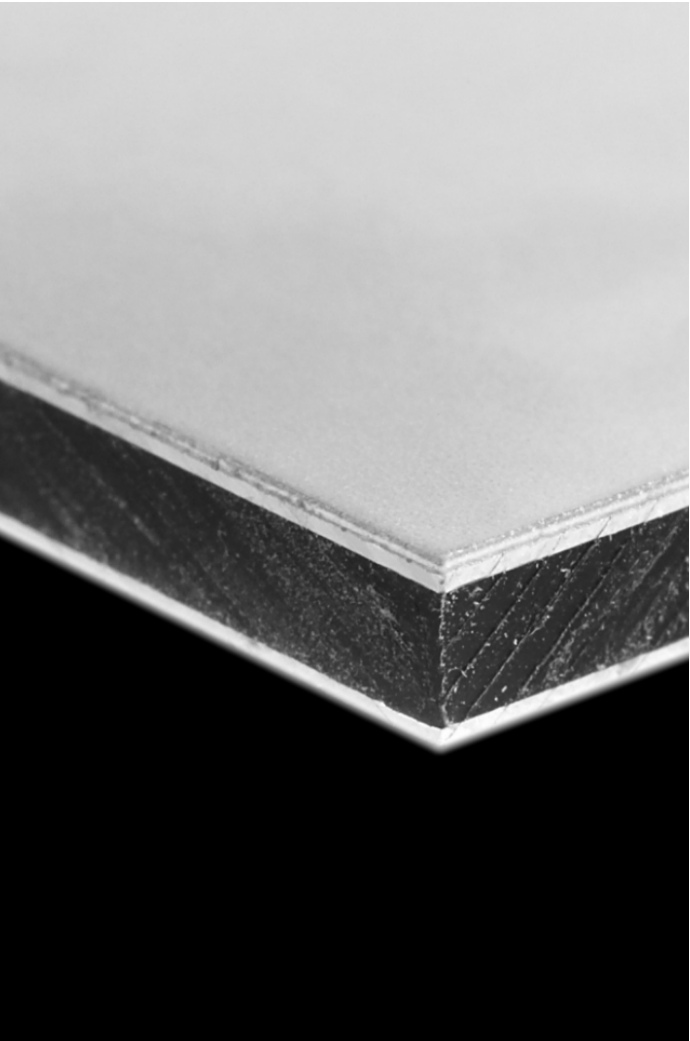

Advantages: We offer broad stock availability, guaranteeing fast delivery times and excellent planning reliability. The company’s technical consultants help to select the right alloy and product design. Our reliable cutting services enable us to work precisely, economically – and on schedule – while guaranteeing consistent material quality.

Pressed products

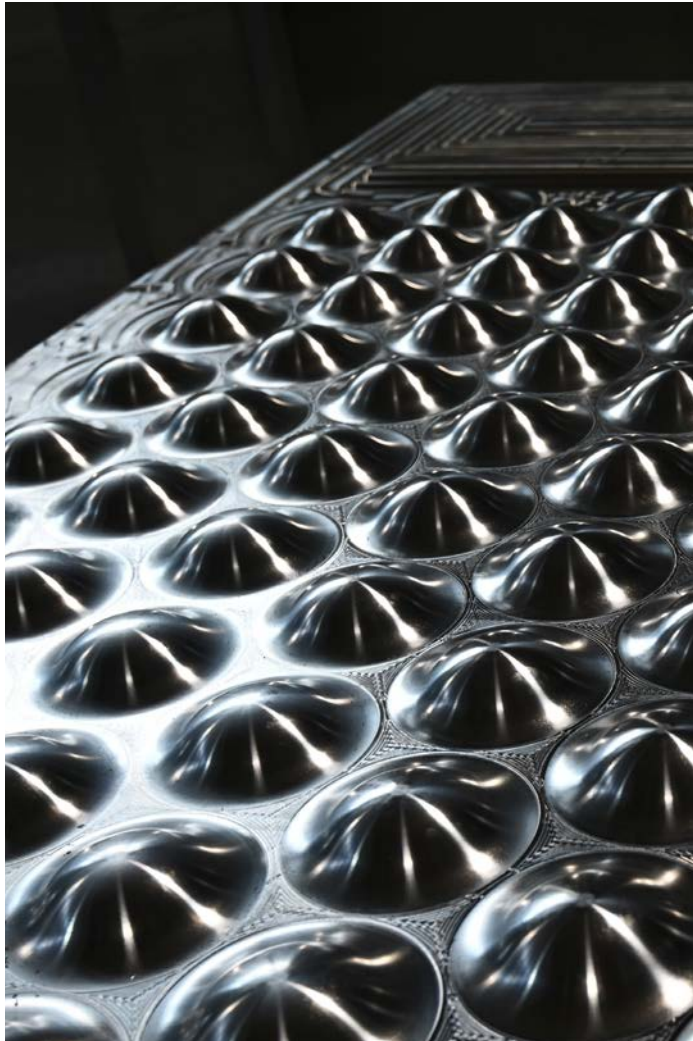

Standard and customized
AMARI offers a wide range of semi-finished products such as rods, tubes, profiles, and angles, as well as special profiles according to drawings. All extrusions can be custom processed.

Advantages: Fast availability, multiple implementation options, and precise manufacturing.

Composite products

Aluminum composite panels are popular with architects as a construction material due to their lightness and stability. The panels are corrosion- and weather-resistant, and the polyethylene core prevents any liquids from passing through. These aluminum composite panels are ideal for outdoor use. The solid structure of the aluminum composite panel can be processed easily by cutting, sawing, or hydroforming.

05

We promise supreme precision and quality.

AMARI is the perfect partner for high-precision aluminum milled parts. We transform sheet metal blanks into precisely machined milled parts. We manufacture sophisticated components reliably and quickly, according to your requirements – be it complex geometries, large-area machining or tight tolerances.

Milling

State-of-the-art CNC technology allows us to guarantee the highest quality and absolute dimensional accuracy. Sophisticated machinery also enables us to process aluminum plates up to 8 meters in length for precise results – even with large-format components. Our expertise ensures exact contours, tolerances, and surfaces – through seamless CAD data integration and the use of state-of-the-art 5-axis milling machines from design to finished milled part. In cooperation with long-standing partners, we offer anodizing and powder coating, as well as various other surface finishes.

06

We get our partners moving and provide an economic advantage with ready-to-install components.

Rail

AMARI is a leading supplier and partner in Europe for the construction of components for rail vehicles. Transport and traffic system construction is clearly trending towards positive energy balance during use. Aluminum is a particularly suitable construction material for achieving this goal. Low weights and high durability enable significant fuel and energy savings in maintenance and use. AMARI manufactures raw car bodies, sub-structures, structural parts, pantographs, and interior cladding; all precisely tailored to the highest technical requirements.

Road

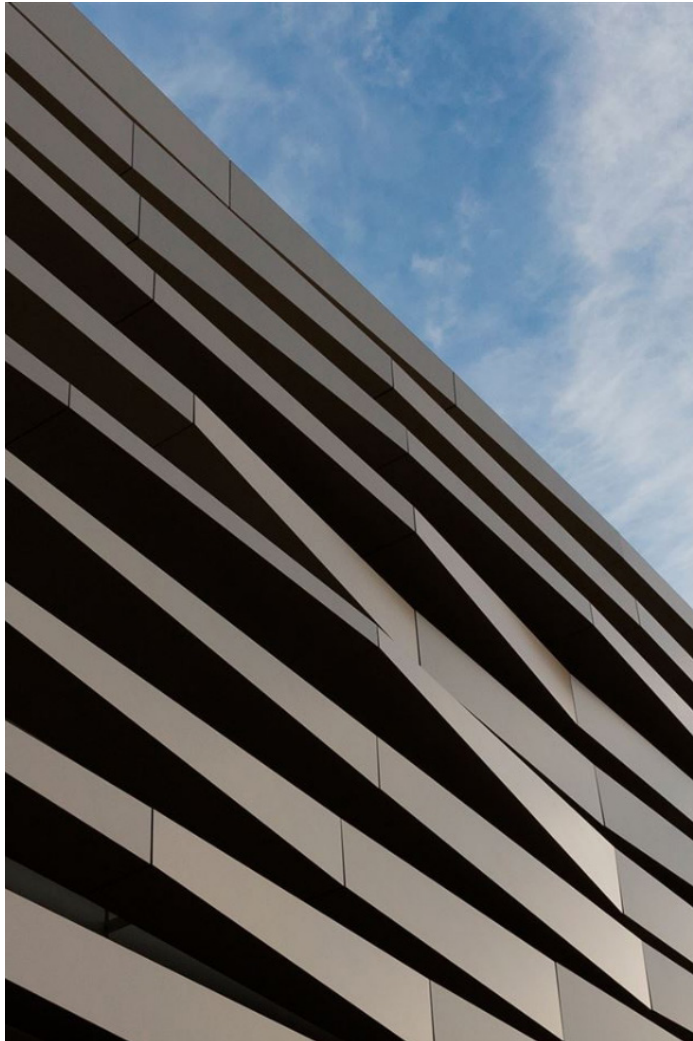

AMARI has over 45 years of experience manufacturing vehicle components. The outstanding properties of aluminum – low weight, attractive design, and high corrosion resistance – enable optimized designs to cope with high payloads. AMARI's experts work closely with customers – from conception to completion – to implement all customer-defined requirements.

07

amadeus

Put everything you thought you knew aside! AMARI has developed amadeus sliding elements to enable freedom of access – one of the most precious things in life. amadeus offers the most sophisticated, high-end sliding elements – making the invisible indispensable – not by separating, but by expanding, opening up, and enabling. And by touching.

Ventilated facades

AMARI facade systems provide the solution for all those looking for design and functionality from a single source. We have installed over 10 million square meters of surfaces in the past 45 years, reinvesting this experience to ensure unique projects are implemented to perfection. Our highly weather-resistant surfaces ensure durability with a 10-year color guarantee. Alucobond facades are tested in accordance with OIB guidelines, certified according to international quality standards, and made from 100% recyclable material for a sustainable future.

Flood protection

Take precautions and avoid unpleasant surprises, since, especially in the summer, storms, hailstones and flooding are becoming more frequent and causing severe damage. Consequently, in recent years mobile flood protection systems have grown in importance. Our range of system designs enables us to offer standard solutions and customized solutions. All solutions can be implemented within a short period of time.

Quality Meets Passion

Short
delivery times

Consistently high

Latest
technologies

08

AMARI meets individual customer requirements and guarantees the unbeatable customer benefits of tailor-made solutions.

09

As an industry leader we are committed to playing a decisive and positive role in shaping the future, and to exploiting the many possibilities of aluminum processing.

Cutting service

Our in-house production capacities allow us to provide a precise, supreme-quality, cutting service for aluminum plates and semi-finished products, guaranteeing short delivery times of 12 to 48 hours. We save you time, reduce waste, and you benefit from a complete single-source service.

Milling

AMARI is the ideal choice for high-precision aluminum components. We manufacture all your CNC milled parts with state-of-the-art technology and the highest precision – individual parts, small batches, or large series. Our machines guarantee complex geometries, perfect surfaces, and tailor-made solutions according to your specifications.

Welding

AMARI offers professional welding solutions for aluminum components and assemblies that meet the highest requirements in terms of strength, precision, and quality. State-of-the-art welding processes create durable connections – both for simple components and complex assemblies. AMARI provides support – from the initial idea to the finished product.

Pre-assembled components

AMARI not only handles component manufacturing, but also the assembly of components and subassemblies. Based on drawings, parts lists and assembly plans, we assemble milled, welded, and machined aluminum parts into ready-to-install units—including screw fastening, adjustment, and functional testing – flexibly, from single pieces to serial production.

Additive manufacturing (3D printing)

Prototypes and small series can be designed with maximum freedom. Additive manufacturing (3D printing) allows AMARI to offer flexible solutions for the fast and economical production of prototypes, functional samples, and small series. Complex geometries can be implemented directly from CAD data without tooling costs. This is ideal for development, testing and bespoke solutions.

10

The quality and safety of every product is AMARI’s top priority.

AMARI is sending out strong signals in the fields of quality, environmental awareness and safety. It attaches great importance to quality, and has established an ISO 9001-compliant quality management system to guarantee the quality of its products and services. AMARI is also committed to guaranteeing environmental protection and occupational safety. Similarly, compliance with the DIN EN 15085-2 standard for welding work underscores its commitment to quality standards.

Individual consulting at the customer's premises

Project support

AMARI employees invest the company's many years of experience in each and every customer project – from the initial contact to the finished product; and are happy to provide tailored advice for solutions made of, with, and from aluminum.

Advice on functionality

AMARI employs experts with a wide range of expertise to provide advice on implementation options with regard to functionality, strength, structural physics, and the cost-effectiveness of each end product.

Material selection

We offer customized solutions with high-quality materials and surfaces. Our expertly-trained specialists look forward to advising you.

Design consultation

Highly competent employees assist customers in the design and finalization of the end product. We ensure the highest quality standards by cooperating with long-standing partners when anodizing, painting and powder-coating our products.

Benefits:

- Reliable delivery via a proprietary fleet of vehicles and long-standing shipping partners
- Aluminum products available across the entire portfolio
- 3-shift production
- Unbeatable expertise from over 50 years of experience
- AMARI is a full-range supplier for all aluminum products

We turn visions into solutions.
Contact AMARI – and experience a winning combination of quality, expertise, and service.
